### 6. Project Scope:

Development of the "Vital Tracker" Android application, designed primarily to aid users in monitoring vital statistics, tracking location, and detecting potential falls. The application integrates these core functionalities seamlessly to provide users with peace of mind regarding their safety and well-being.

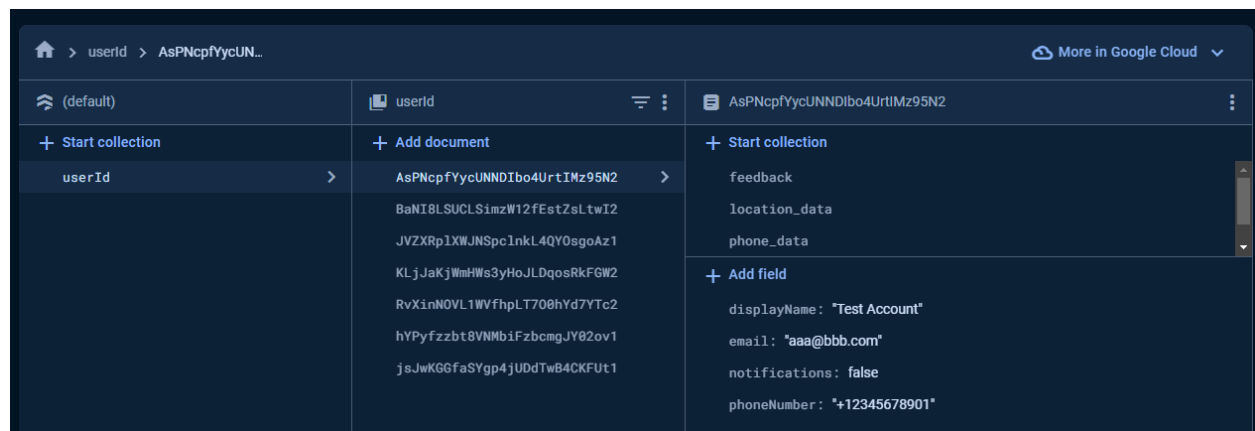

## 7 - 9. Member Info and Participation

NAME & GITHUB	ID	SIGNATURE	EFFORT
Patrik Prenga (PatrikPrenga8752)	n01428752	<i>Patrik Prenga</i>	100%
Michael Carinci (MichaelCarinci0052)	n01480052	<i>Michael Carinci</i>	100%
Jason Macdonald (Jasonmac644)	n01246828	<i>Jason Macdonald</i>	100%
Nicholas Rafuse (NicholasRafuse0073)	n01440073	<i>Nicholas Rafuse</i>	100%

## 10 & 11. Github Link

<https://github.com/MichaelCarinci0052/LifesaverEngineersVitalTracker.git>

## 12. Test Account

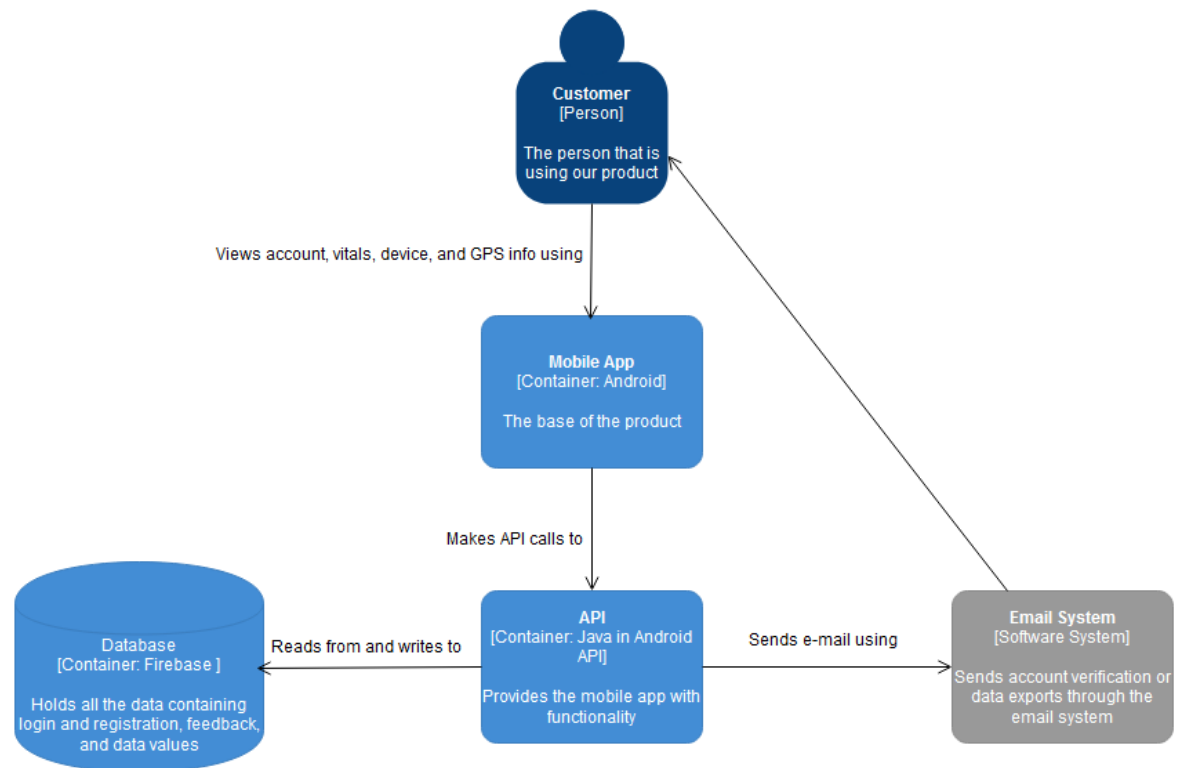

## 16. Sprint goals

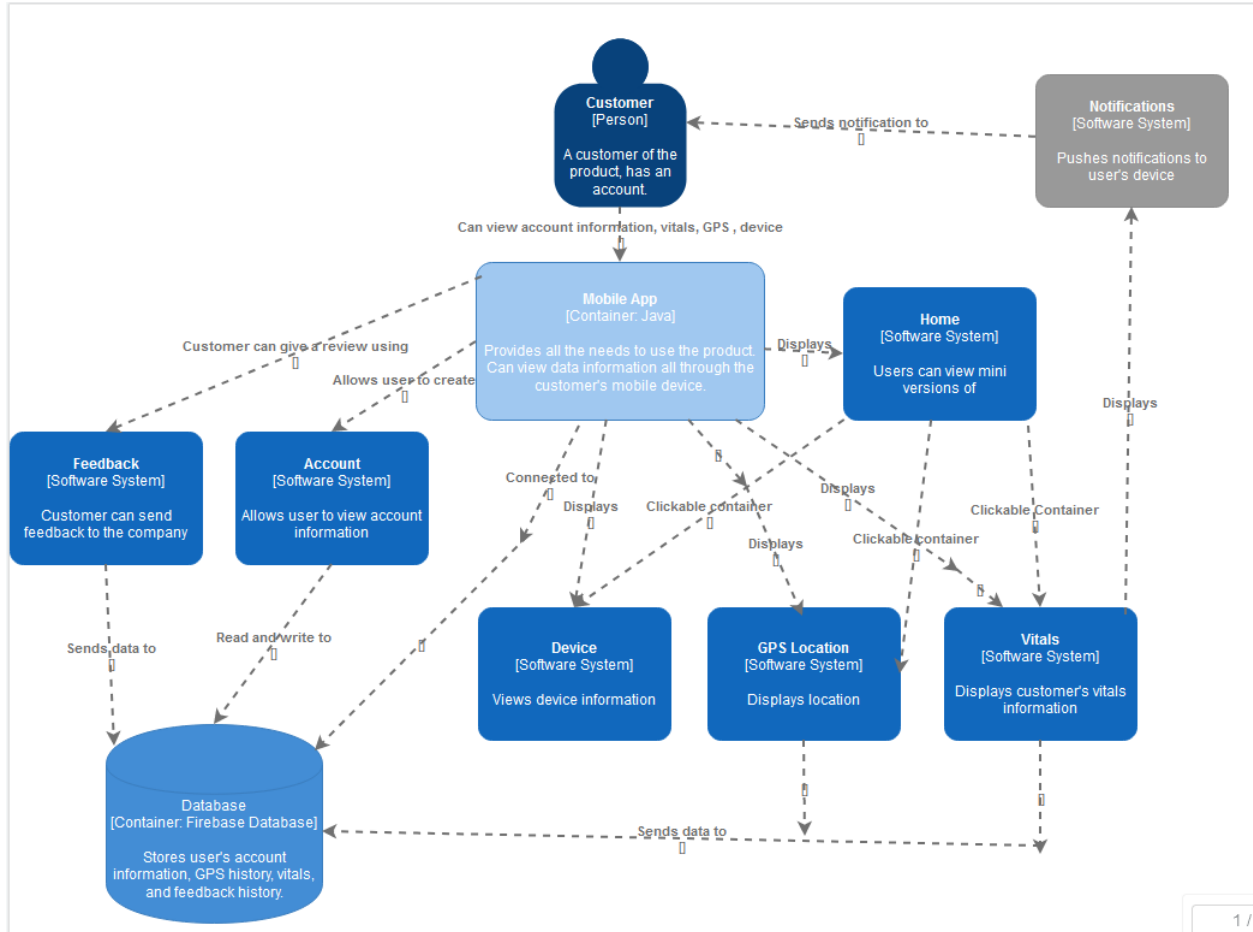

- Complete full app functionality with zero bugs
- Redesign UI for Device, Configuration, and GPS screens
- Be able to completely display data values in the Vitals screen
- Complete test cases to document testing for multiple screens

- Implement offline functionality

## 17. Container Diagram

## 18. Component Diagram

## 20. Demonstrating the use of features (AlertDialog, Snackbar, Toast, Notification)

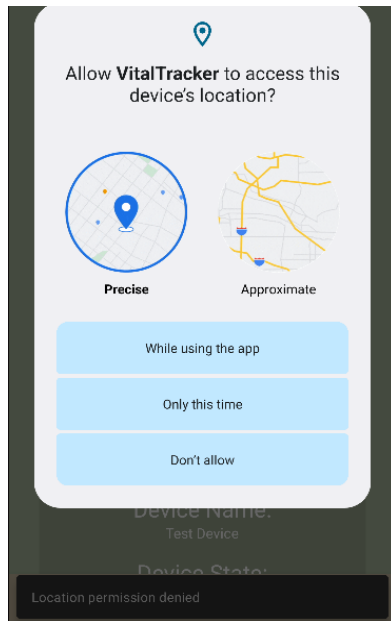

### AlertDialog:

This is one instance of an AlertDialog being used, when the user clicks on the “Export Data” button on the Vitals screen. It asks the user for confirmation to send data to their email.

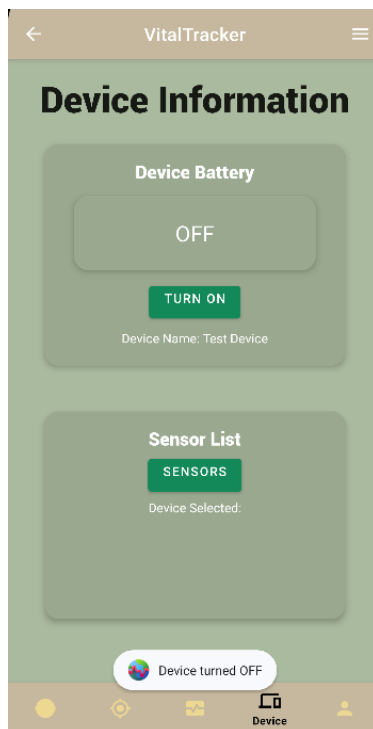

### Snackbar:

This is one instance of how we use a snackbar in our app. It appears on the GPS screen, and it activates based on if the user allowed GPS permissions. On first open, it will say “Location permission denied”. After allowing permission, a new snackbar will appear saying “Permission Granted”

#### Toast:

This is one instance of the toast being used in our app. This appears when the user clicks the “Turn On / Off” button on the Device Screen. It tells the user whether or not the device was turned on or off.

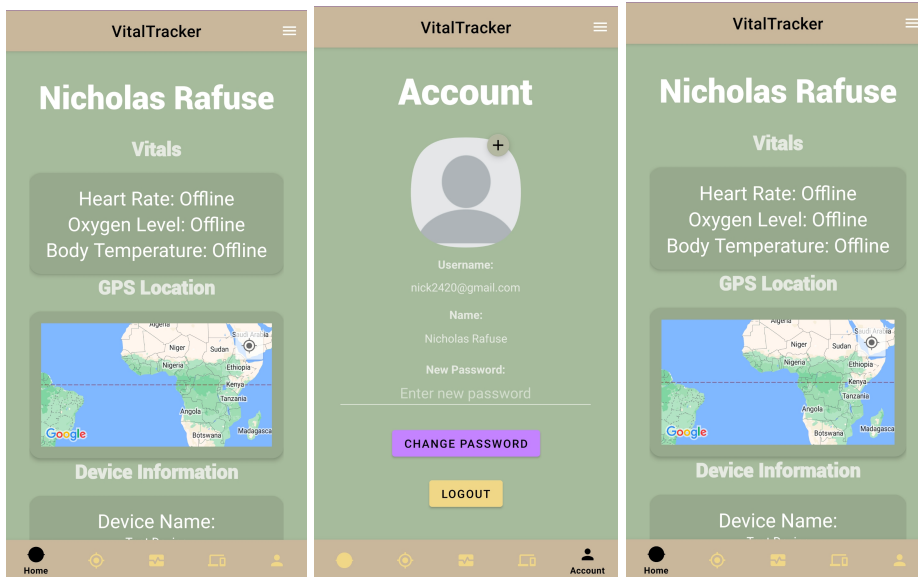

#### Notification:

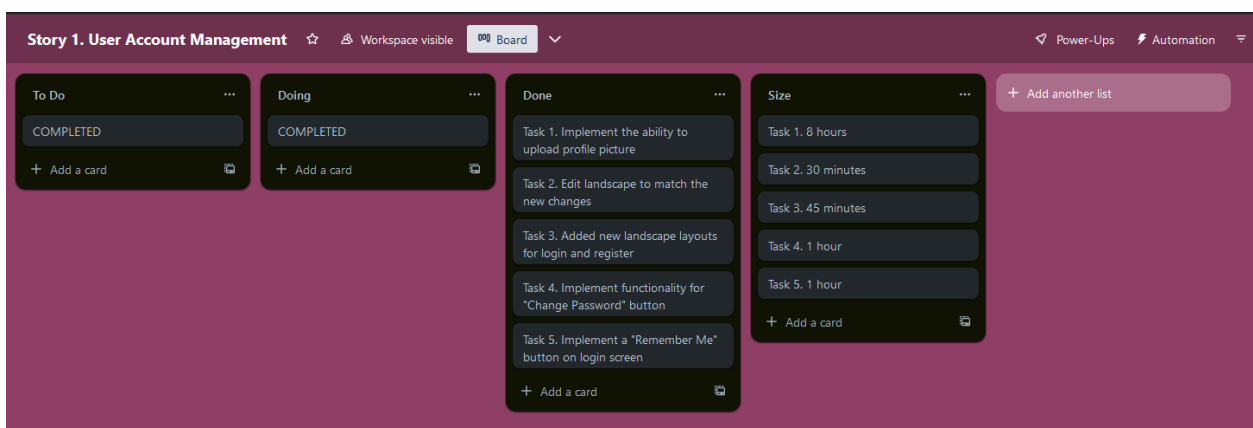

This is how our app uses notifications. It uses the vitals data, and if it detects an abnormal body temperature, it will send a notification to tell the user. This is important for if the user is currently not using the app. There is also a setting provided that allows the user to disable notifications.

## 21. Offline mode functionality

## 23. Scrum Dashboard (showing only the new tasks)

Story 2. Vitals Monitoring

Workspace visible

Board

Power-UpsAutomation

To Do

Implement and connect sensor readings (Future)

+ Add a card

Doing

COMPLETED

+ Add a card

Done

Task 1. Add new landscape mode

Task 2. Create graphs to display values and time

Task 3. Implement date picker

Task 4. Add a button to allow exportation of data - to user's email

+ Add a card

Size

Task 1. 30 minutes

Task 2. 1 day

Task 3. 2 hours

Task 4. 4 hours

+ Add a card

+ Add another list

Story 3. Device Mangement

Workspace visible

Board

Power-UpsAutomation

To Do

Accurately display device information from sensors (Future)

+ Add a card

Doing

COMPLETED

+ Add a card

Done

Task 1. Redesign UI of Device screen

Task 2. Add text to display current device name an display whether it is on or not

Task 3. Allow user to click on a sensor and display the chosen option

Task 4. Sync up the device state text with the home screen to show the same response

Task 5. Create new landscape layout

+ Add a card

Size

Task 1. 3 hours

Task 2. 30 minutes

Task 3. 30 minutes

Task 4. 2 hours

Task 5. 30 minutes

+ Add a card

+ Add another list

Story 4. Location Tracking

Workspace visible

Board

Power-UpsAutomationFilters

To Do

Accurately show location of physical device (Future)

+ Add a card

Doing

COMPLETED

+ Add a card

Done

Task 1. Redesign GPS screen

Task 2. Store GPS data in the updated history screen

+ Add a card

Size

Task 1. 1 hour 30 minutes

Task 2. 1 hour

+ Add a card

+ Add another list

Story 5. App Settings Management

Workspace visible

Board

Power-UpsAutomationFilters

To Do

COMPLETED

+ Add a card

Doing

COMPLETED

+ Add a card

Done

Task 1. Implement functionality for the "Restore Default" button

Task 2. Add lanscape layout for Settings

Task 3. Redesign Configurations screen to have a container background

Task 4. Add new landscape layout for Configurations

+ Add a card

Size

Task 1. 1 hour

Task 2. 30 minutes

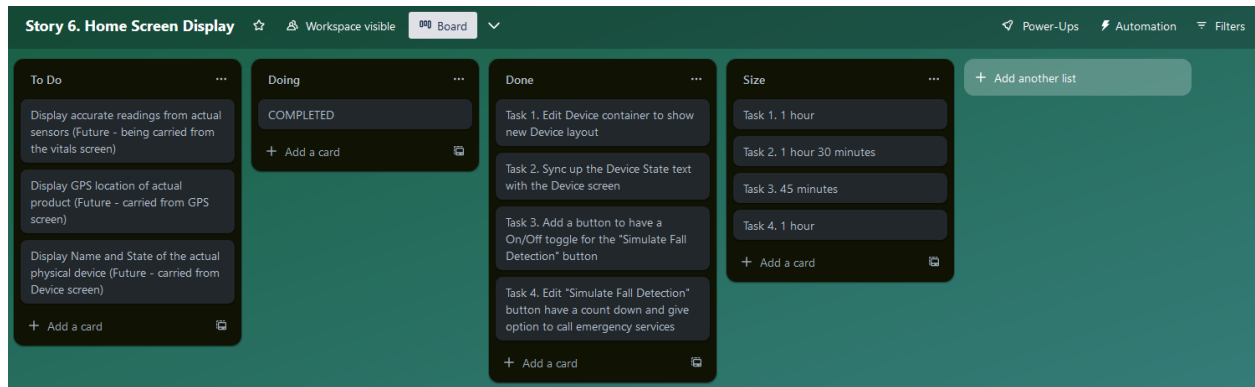

Task 3. 45 minutes

Task 4. 30 minutes

+ Add a card

+ Add another list

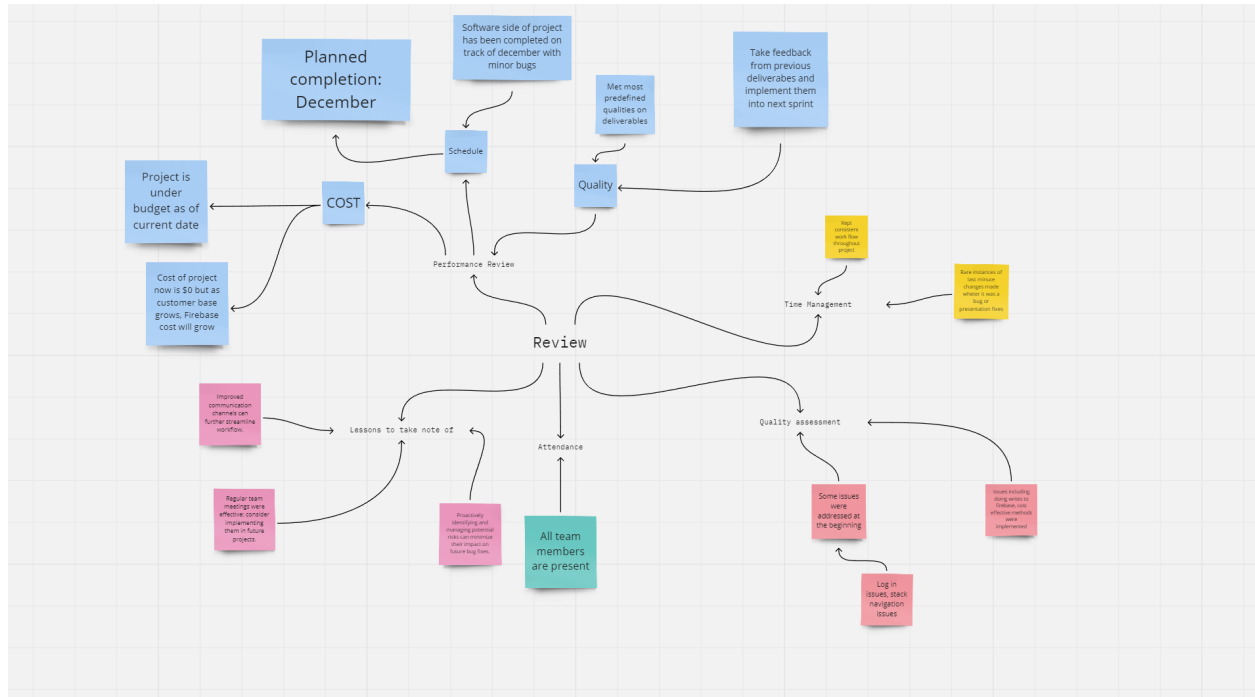

## 24. Post-Mortem, Project Review Meeting

Project Review Meeting (use a tool to record)

[https://miro.com/welcomeonboard/d1BrNTBuSUNMN0RaYW9ybFRDbWM2QWRpM3RYcXhGaGlydnh6cDZwajhaZ21TbEdxQ1FZdldnMlpaRTdladJxb3wzNDU4NzY0NTYzNzg3NjU1NzAxZDI=?share\\_link\\_id=521590522966](https://miro.com/welcomeonboard/d1BrNTBuSUNMN0RaYW9ybFRDbWM2QWRpM3RYcXhGaGlydnh6cDZwajhaZ21TbEdxQ1FZdldnMlpaRTdladJxb3wzNDU4NzY0NTYzNzg3NjU1NzAxZDI=?share_link_id=521590522966)

## 26. How did we address technical debt

We addressed technical debt in our app through multiple different ways:

- Removing repeated code and creating singular functions that can be called whenever we use it (using design principles to produce better quality)
- Creating test cases to ensure effectiveness and to debug where necessary
- Catching exceptions (Example, when the user logs in or registers their account, providing feedback and returning an error if unsuccessful)
- Code refactoring (expanded in next section)

## 27. Two areas of refactoring and why we did it

Area 1. One of the areas we refactored was the Device screen. This was done to provide a much better visual experience along with keeping the original code. We accomplished this by separating the two initial buttons into two containers, that way each can have its own separate functionality. We also added additional code onto it to enhance implementation, such as syncing the text between multiple screens and displaying current options with the Sensor List and Device Name.

Code for creating the two containers in the xml file:

```
<?xml version="1.0" encoding="utf-8"?>
<FrameLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".DeviceFragment"
    android:background="@color/ashGreen">

    <LinearLayout
        android:layout_width="match_parent"
        android:layout_height="match_parent"
        android:layout_gravity="center_horizontal|top"
        android:gravity="center_horizontal"
        android:orientation="vertical"
        android:paddingTop="16dp">

        <TextView
            android:id="@+id/userAccountName"
            android:layout_width="wrap_content"
            android:layout_height="wrap_content"
            android:layout_marginBottom="24dp"
            android:fontFamily="@font/roboto_black"
            android:text="@string/deviceinfo"
            android:textAppearance="@style/TextAppearance.AppCompat.Large"
            android:textSize="40sp" />
```

```
<FrameLayout
    android:id="@+id/batterycontainer"
    android:layout_width="331dp"
    android:layout_height="243dp"
    android:layout_marginTop="0dp"
    android:layout_marginBottom="-50dp"
    android:background="@drawable/container_background"
    android:elevation="4dp"
    android:padding="16dp">
```

```
<TextView
    android:id="@+id/devices"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_gravity="center_horizontal|top"
    android:layout_marginBottom="24dp"
    android:fontFamily="@font/roboto_black"
    android:gravity="center_horizontal"
    android:text="Device Battery"
    android:textAppearance="@style/TextAppearance.AppCompat.Body1"
    android:textColor="@color/white"
    android:textSize="20sp" />
```

```
<FrameLayout
    android:id="@+id/batterycontainer2"
    android:layout_width="266dp"
    android:layout_height="wrap_content"
    android:layout_gravity="center_horizontal|top"
    android:layout_marginTop="40dp"
    android:background="@drawable/container_background"
    android:elevation="4dp"
    android:gravity="center_horizontal"
    android:padding="25dp">
```

```
<LinearLayout
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:gravity="center_horizontal"
    android:orientation="vertical">
```

```
<TextView
    android:id="@+id/batteryLifeTextView"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:text="OFF"
```

```
android:textAppearance="@style/TextAppearance.AppCompat.Body1"
    android:textColor="@color/white"
    android:textSize="24sp" />
```

```
</LinearLayout>
```

```
</FrameLayout>
```

```
<Button
```

```
    android:id="@+id/toggleDeviceButton"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_gravity="center_horizontal|bottom"
    android:layout_marginTop="16dp"
    android:layout_marginBottom="30dp"
    android:gravity="center_horizontal"
    android:text="Turn On" />
```

```
<TextView
```

```
    android:id="@+id/devicename"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_gravity="center_horizontal|bottom"
    android:layout_marginBottom="5dp"
    android:gravity="center_horizontal"
    android:text="Device Name: Test Device"
    android:textAppearance="@style/TextAppearance.AppCompat.Body1"
    android:textColor="@color/white" />
```

```
</FrameLayout>
```

```
<FrameLayout
```

```
    android:id="@+id/sensorcontainer"
    android:layout_width="331dp"
    android:layout_height="228dp"
    android:layout_marginTop="100dp"
    android:background="@drawable/container_background"
    android:elevation="4dp"
    android:padding="16dp">
```

```
<TextView
```

```
    android:id="@+id/sensorlist"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_gravity="center_horizontal|top"
    android:fontFamily="@font/roboto_black"
    android:gravity="center_horizontal"
    android:text="Sensor List"
    android:textAppearance="@style/TextAppearance.AppCompat.Body1"
    android:textColor="@color/white"
    android:textSize="20sp" />
```

```

        <Button
            android:id="@+id/buttonSensors"
            android:layout_width="wrap_content"
            android:layout_height="wrap_content"
            android:layout_gravity="center_horizontal|top"
            android:layout_marginTop="30dp"
            android:gravity="center_horizontal"
            android:text="Sensors" />

```

```

        <TextView
            android:id="@+id/deviceSelected"
            android:layout_width="wrap_content"
            android:layout_height="wrap_content"
            android:layout_gravity="center_horizontal|top"
            android:layout_marginTop="80dp"
            android:gravity="center_horizontal"
            android:textColor="@color/white"
            android:text="Device Selected:" />

```

```

    </FrameLayout>

```

```

</LinearLayout>

```

```

</FrameLayout>

```

Area 2. Another area that we refactored was the Configuration screen, as similarly to the Device screen, we implemented a new container with a background for the configuration screen to sit in. This was done for enhanced visibility as it was a little hard to see and read on the default green background.

Code for the new refactored Configuration screen:

```

<?xml version="1.0" encoding="utf-8"?>
<FrameLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:background="@color/ashGreen"
    tools:context=".FeedbackFragment">

    <LinearLayout
        android:layout_width="match_parent"
        android:layout_height="300dp"
        android:layout_margin="8dp"

```

```
</TableRow>
```

```
<!-- Row 1: Home Location -->
```

```
<TableRow>
```

```
<TextView
```

```
    android:layout_width="0dp"
```

```
    android:layout_weight="2"
```

```
    android:text="@string/location2" />
```

```
<TextView
```

```
    android:layout_width="0dp"
```

```
    android:layout_weight="3"
```

```
    android:text="@string/set_home_location" />
```

```
<TextView
```

```
    android:layout_width="0dp"
```

```
    android:layout_weight="2"
```

```
    android:text="@string/user_input" />
```

```
</TableRow>
```

```
<!-- Additional Spacing Row -->
```

```
<TableRow>
```

```
<Space
```

```
    android:layout_width="match_parent"
```

```
    android:layout_height="8dp" />
```

```
</TableRow>
```

```
<!-- Row 2: Lock Orientation -->
```

```
<TableRow>
```

```
<TextView
```

```
    android:layout_width="0dp"
```

```
    android:layout_weight="2"
```

```
    android:text="@string/lock_orientation" />
```

```
<TextView
```

```
    android:layout_width="0dp"
```

```
    android:layout_weight="3"
```

```
    android:text="@string/prevent_screen_rotation" />
```

```
<TextView
```

```
    android:layout_width="0dp"
```

```
    android:layout_weight="2"
```

```
    android:text="@string/on_off" />
```

```
</TableRow>
```

```
<!-- Additional Spacing Row -->
```

```
<TableRow>
```

```
<Space
```

```
    android:layout_width="match_parent"
```

```
    android:layout_height="8dp" />
```

```
</TableRow>
```

```
<!-- Row 3: Notification Toggle -->
```

```
<TableRow>
```

```
<TextView

```

```
    android:layout_weight="3"
```

```
    android:text="@string/reset" />
```

```
<TextView
```

```
    android:layout_width="0dp"
```

```

        android:layout_weight="2"
        android:text="@string/button_input" />
    </TableRow>

    <!-- Additional Spacing Row -->
    <TableRow>

        <Space
            android:layout_width="match_parent"
            android:layout_height="8dp" />
    </TableRow>

    <!-- Additional Spacing Row -->
    <TableRow>

        <Space
            android:layout_width="match_parent"
            android:layout_height="8dp" />
    </TableRow>

    <!-- Email Verification Status Row -->
    <TableRow>

        <TextView
            android:layout_width="0dp"
            android:layout_weight="2"
            android:text="Email Verification Status" />

        <TextView
            android:id="@+id/emailStatusTextView"
            android:layout_width="0dp"
            android:layout_weight="3"
            android:text="Verification success or unsuccessful" />

        <TextView
            android:layout_width="0dp"
            android:layout_weight="2"
            android:text="Toast" />
    </TableRow>

</TableLayout>
</LinearLayout>

</FrameLayout>

```

28. Suggestions to the instructor for future projects, things we liked, and things we would suggest to be done differently and how

Suggestions:

- Add in a requirement that a specific amount of daily stand ups have to be concluded
- Checkpoints for commits

Things we liked:

- Being able to design the app entirely ourselves
- Linking the app with the data values (Sensors in the future)
- Learning about the app life cycle

Things we would suggest to be done differently:

- Less focus on the diagrams, maybe only require 1 or 2 as opposed to all of them

29 - 30. Subfolder for PDF and powerpoint
